SOLAR AND INVERTER SOLUTION

Solar and Inverter Solution is a solution that is captured by heat and lights from the sun, and it's been used as an energy source for homes and businesses of all sizes in reducing the cost being spent on electricity bills.

SOLAR STREET LIGHT SOLUTIONS

Solar Street Light Solutions are raised light sources that are powered by solar panels generally mounted on the lighting structure or integrated into the pole. The solar panels charge a rechargeable battery, which powers the fluorescent or LED lamp during the night.

SOLAR WATER HEATERS

Solar Water heaters are sophisticated devices that can heat water, with the help of the sun, with just only 2 hours of sunshine per day.

VHF RADIO SYSTEM

VHF Radio System is a Very High Frequency (VHF) radio system operates between 30 and 300 MHz's Primarily used in marine, aviation, and commercial industries, it provides reliable, short-range (line-of-sight) voice and digital communication without relying on cellular networks. It is highly valued for emergency alerts and coordination

ACCESS CONTROL

- Multi-location Access Control: a selective restriction of access to a place or other resource location. The act of accessing may mean entering, using, or consuming.
- Permission to access a resource is called authorization via Pin, Password, Facial authentication Palm authentication, etc.

SURVEILLANCE

- Surveillance/Video Analytics: a protection system that involves continuous, systematic collection, analysis, and interpretation of information through monitoring behavior, activities, or other changing information for the purpose of influencing, managing, directing, or protecting people.
